YOUNES SAOUABEDDINE

Data and AI Engineer

younes.saouabeddine2001@gmail.com | +212 632 06 1697 | **Casablanca**, Morocco | Younes | Portfolio

PROFESSIONAL EXPERIENCE

Data and AI Engineer | PFE Intern

DNA Engineering

February 2025 – August 2025 | Casablanca, Morocco

- Built an ATS based on a Retrieval-Augmented Generation (RAG) system to retrieve top-k candidates using Qdrant for similarity search and re-rankers to optimize candidate matching.
- Developed a scheduler agent leveraging LangGraph and Model Context Protocol server to automate meeting scheduling with candidates, enhancing recruitment efficiency.

Python | Qdrant | RAG | FastApi | MCP | OCR | Jira | LLM | LangGraph

Generative AI Developer Intern | PFA

Brexia

June 2024 – August 2024 | Casablanca, Morocco

- Development of a FastAPI API with an MVC architecture for Retrieval-Augmented Generation (RAG) on PDFs. Processing and storing PDFs in chunks in MongoDB under Docker. Integration of Qdrant for similarity search and use of open-source language models for contextual responses. Optimized design for scalability and efficiency.
- Transforms static documents -PDFs , TXT- into an interactive ChatBot assistant that lets teams ask questions and quickly find needed information, reducing manual document searching, saving time, and improving daily work productivity.

FastAPI | MongoDB | Qdrant | Docker | LangChain

Data Pipeline and Analysis with Azure

Digiole

August 2024 – September 2024 | Casablanca, Morocco

- Design of a data pipeline for ingesting data from an on-premise SQL server to Azure Data Lake Gen2 via Azure Data Factory. ETL transformations using Databricks and PySpark. Integration of Azure Synapse Analytics for data analysis and creation of Power BI dashboards. Secured with Azure Active Directory and Key Vault.

Azure | Databricks | PySpark | Power BI | SQL Server | Azure Data Factory

PROJECTS

Intelligent Conversational Agent for Data Querying

Created a conversational agent for querying data from CSV and Excel files.

Langchain | MySQL | Streamlit | HuggingFace | Python

Facial Emotion Detection App

Developed an application to detect facial emotions in real time using a Convolutional Neural Network (CNN) and Haar Cascade Classifier from OpenCV.

CNN | OpenCV | TensorFlow | Python

Breast Cancer Classification App

Machine Learning | Python | Flask

NLP: Fine-Tuning Gemma3-270b

Fine-Tuning On DoDa dataSet with QLoRA technic using Unsloth

PROFILE

Data and AI Engineer, recently graduated from the National School of Applied Sciences of Al Hoceima, eager to apply my expertise in data engineering and artificial intelligence to innovative projects.

SKILLS

Programming Languages and OS

Python | R | C/Java SE | Java EE | Linux | Spring boot | HTML | CSS | JavaScript

Databases

Postgres | Oracle | SQL Server | MySQL | RDF-star | MongoDB | Neo4j | Cassandra | Redis

Data Engineering

Apache Airflow | Apache Kafka | Apache Spark | Hadoop | Databricks | ETL/ELT

Data Science/ML

TensorFlow | PyTorch | NLP | Fine-tuning | QLoRA | LangChain | Scikit-Learn | LangGraph | n8n

Cloud Services

Azure | Microsoft Fabric | AWS | GCP | BigQuery

DevOps

Docker | Kubernetes | CI/CD

BI and Data Visualization

Power BI | DAX | Excel

EDUCATION

National School of Applied Sciences of Al Hoceima (ENSAH)

Data Engineering

2020–2025 | Al Hoceima, Morocco

LANGUAGES

French
English
Arabic

INTERESTS

Data Engineering | NLP | Reading | AI Research
